- a. I consistently put on a light amount and where the same colors
 - b. I like to change your eye and lip color depending on you're the colors of your outfit
 - c. I like a dramatic look on a consistent basis

All letter 'A' answers equal 1 point, all letter 'B' answers equal 2 points and all letter 'C' answers equal 3 points. Add up your score and learn which permanent make look best suites your style!

Score of 5-9: You are the natural, outdoorsy type. You are an excellent candidate for an eyelash enhancement or a thin eyeliner application in a neutral color that best blends with your skin type (light brown to black) verses a brighter color such as blue or green. Your lip color should be natural – just enough to keep your lips from not looking pale, yet not necessarily looking as if you're wearing lipstick either. You can always enhance your look with added eye shadow and lipstick when you dress up.

Score of 10-12: You like classic elegance. Since you wear different looks at different times, it's best to go with a neutral conservative eye liner (thin to medium) in medium brown to black verses a brighter color such as blue or green. Brighter colors can be added with shadows for evenings for a more dramatic effect. Lips can be a medium to full color in a tone that is the deeper version of your own lips. For most this is a 'blush' or 'wine' - perfect with a gloss to enhance during the day or a lipstick to change up with different outfits at night. You're probably an excellent candidate for a beauty mark as well! Lots of versatility with this look!

Score of 13-15: You are glamorous and trendy! You wear your fashion heart on your sleeve at all times. You've got several possibilities - a medium to thick eye liner in a neutral color than you change up on different occasions or a bright color for all times such as violet, teal or sapphire. You are also a candidate for specialized effects such as a liner with an added smudge tone (i.e. black liner that fades into a brown or enhanced with a second brighter tone). Lips should be full color with liner in the same or different shade. Possibilities are really endless for you, creativity is everything!

(On a separate sheet of paper, write down the letter of your quiz answer next to each number)
